THE KEYNOTE

The “Ations” of Agriculture

Damian's presentation is a forward looking outlook about issues in the marketplace that will be impacting the business of Agriculture. It is fast paced, humor infused Ag commentary where he connects the dots from consumer issues to regulation to political movements to societal changes and current events and what it means for our industry. Also, he puts in a bit of feel good facts about the industry. And, he provides business reality and opportunity coverage, always bringing the issues back to the crowd and making it about them. Beginning 2023 Damian titled the program The “Ations” of Agriculture, addressing the words ending in “ation” that impact our industry: Immigration, population, regulation, confrontation, inflation, threats from other nations.
