

A/V and Room SET UP Requirements for Damian Mason

These will help set the stage for a successful event.

1. Standard items requested are: A Lectern on stage and a cordless lapel microphone (preferred), or a cordless handheld microphone (second choice).
2. A projector and screen may be required that can be connected to a Mac Computer, which is determined by the program requested. Professional technical assistance must be available to troubleshoot any issues that may arise.
3. Lighting requirements: Stage should be fully illuminated. Audience portion of the room should be at least 50% lit.
4. An introduction for Damian will be provided and may be read by a member of your organization.
5. If this is a meal function, introduce Damian after the audience is finished eating.
6. We request the wait staff to depart prior to Damian's presentation to eliminate distraction and noise.
7. Please do not announce a 'quick break' or schedule a '5 minute stretch' immediately prior to Damian taking the stage. This creates havoc when trying to regroup and gives people permission to leave or otherwise 'check out' from the program.
8. Keep your audience in close proximity to the stage or front of room (within 6-8 feet). Guide your people to the front tables and chairs. Use RESERVED signs on tables in the BACK of the room to fill front tables.
The reason for this is large open spaces kill crowd interaction, and audience energy. Huge venues with lots of empty seats make meeting planners and speakers both look bad! Select a room that adequately fits your audience size and do not overset the number of chairs and tables. Better to have the attendees 'comfortably close.'
9. I respectfully request that children do not attend. If children are attending, let's talk.

Please acknowledge that you have read and understand the above requirements for a successful program and agree to the requirements by signing below and returning a copy to us.

Thank you! We look forward to your event.
